

Bandicam 1.8.6 Version Update

1. Improved the compatibility with VirtualDub and Avidemux.

(Bandicam saved at 30,00003 FPS instead of 30 FPS)

2. Added 960x540 video size in Format settings.

3. Setting a new shortcut key will disable the previous shortcut key.

4. MPEG-1 codec changes to Xvid automatically when recording over 2560x1600 resolution.

5. Bugs fixed

- New hotkey settings not saving properly.
- GDI resource leak when a recording is paused for a long time.
- Memory overflow when using an external codec.
- Recording status could not be displayed when recording 64-bit programs with DirectX/OpenGL mode.
