

Bandicam 2.1.0 Version Update

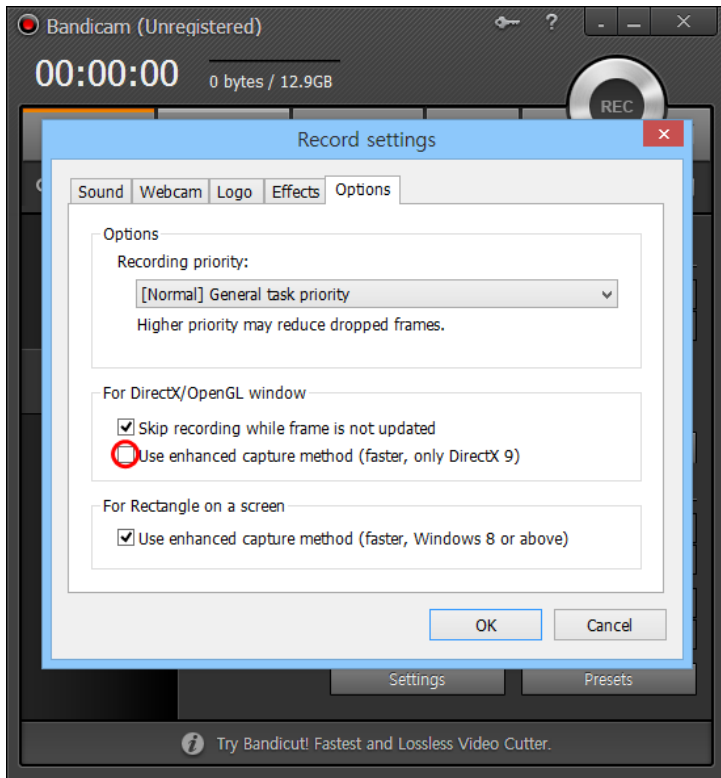

1. Bandicam now supports the .mp4 container.

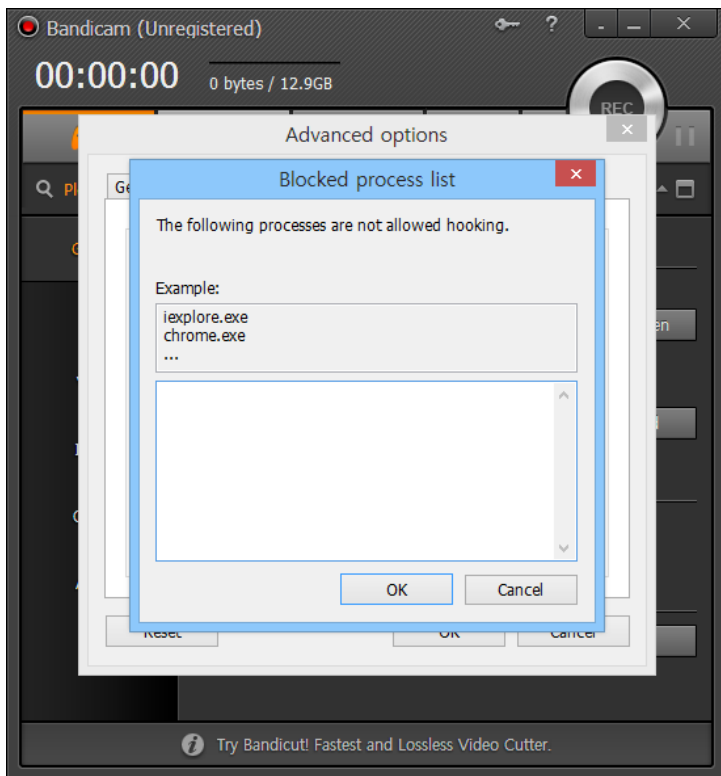

2. Added support for the Media Foundation AAC encoder (Windows 7 or higher)

3. Added support for the AMD APP H.264 encoder (VCE) of AMD Embedded G-Series GPUs (HD 8330E/8310E/8400E/8280E)

4. The "User enhanced capture method (faster, only DirectX 9)" option is unchecked by default.

5. The buffer size in the blocked process list has been doubled.

6. Bugs fixed

- Reduced an error while calculating the time of video frames.
- Failed to use the AMD H.264 encoder if the PC has more than 2 AMD graphics cards.
- Recording status could not be displayed well in the 'DirectX/OpenGL mode' mode on some computers.
- A logo created by GIMP, a free graphic editing program, couldn't be displayed correctly.
- Other minor bugs fixed.
